

DOVERSPERSE 3-NR

Doversperse 3-NR is an aqueous emulsion of liquid chlorinated paraffin of medium chain length. Because of its non-ionic base, it is useful in both anionic and cationic emulsion systems. In addition to contributing to flame retardancy, **Doversperse 3-NR** improves adhesion, imparts chemical and water resistance, and allows the user to formulate aqueous rather than solvent based systems.

Application areas include adhesives, rubber coatings, inks, carpet backings, paper and fabric coatings.

TYPICAL PROPERTIES

Property	Typical Result
Appearance	Cream White
Chlorine Content, %	36
Viscosity, Brookfield @ 25°C	220
Specific Gravity @ 25°C, g/ml	1.2
