

DOVERSPERSE H1235-P Polyisobutylene Succinimide

Doversperse H1235-P is a polyisobutylene succinimide prepared from ~ 1200 MWT HR-PIBSA and high molecular weight amines. The starting PIBSA has been prepared via the thermal route, so there is no chlorine. The succinimide is diluted ~ 35% with 70 SUS paraffinic oil.

PIB-succinimides based on other molecular weights of conventional and HR PIBSAs in different diluents may also be offered.
