

## DOVERNOX® D-9941T 4:1 Blend of Doverphos® S-9228T and AO 1790

**Dovernox D9941T** is a high performance solid antioxidant blend containing **Doverphos S-9228T** and **AO 1790**. The combination of these two high performance additives offer superior performance in many polymer applications compared to standard AO packages. Advantages of this blend are:

- High reactivity
- Low volatility
- Improved thermal stability
- Improved Color
- Improved NOx aging
- Improved Long Term Heat Aging
- Excellent hydrolytic stability
- · Good handling and feeding characteristics
- Lower loading levels compared to conventional AO's

Component Name	CAS#	% By Weight
Doverphos S-9228T	154862-43-8	80%
AO 1790	40601-76-1	20%

## **Typical Properties**

Appearance	White/off white free-flowing granular
%P	5.8%
Acid Number; mgKOH/g	<0.5%
Volatiles 105°C	<0.5%

**Dovernox D-9941T** has broad food approvals and regulatory approvals and can be used safely in most polymer applications, including food packaging.

This information is furnished with the express condition that you will conduct your own tests to determine the suitability of the product for your particular use. (081420)

LGP-11®, LUBE-BOOSTER®, MAYCO®, PAROIL®, SUL-PERM®, SYN-CHEK®, SYNKAD®, CHLOREZ®, CHLOROWAX 40®, CHLOROWAX 50®, DOVERNOX®, DOVERPHOS®, DOVERPHOS HIPURE®, and DOVERPHOS S-9228® are federally registered trademarks of Dover Chemical Corporation.

**Dovernox D-9941T** is offered as both a powder blend as well as non-dusting compacted grade for easy handling in a variety of feeding systems.

## Performance in Polypropylene

**Dovernox D-9941T** was evaluated in polypropylene by multi-pass extrusion at 260C and compared to other antioxidant blends. Both of the competitive blends were run at a 4-1 ratio of the phosphite to primary antioxidant.

**Dovernox D-9941T** shows improved melt low stability after the 5<sup>th</sup> pass indicating that it is providing improved thermo-oxidative protection to the polymer. This combination of a high performance phosphite and primary antioxidant is ideal for many applications where the best performance is needed.
