

BASE 10 E
Sulfurized Fatty Compound
Lubricity/Extreme Pressure Additive

Base 10 E is a 10% sulfurized fatty compound designed to offer both lubricity and extreme pressure properties in oil and water-dilutable metalworking fluids. **Base 10 E** is suitable for products destined for use in yellow metal applications (will not stain).

Base 10 E can be utilized in straight oil machining, drawing and stamping, as well as a soluble oil component. Below are listed typical starting guidelines for usage:

	<u>% Weight</u>
Straight Oil Machining	5 - 15
Straight Oil Drawing & Stamping	3 - 10
Soluble Oil Machining	2 - 10

Base 10 E may be stored in an original container or bulk storage tank. Prolonged exposure to 0°F may result in solidification. If the product solidifies, warming to 100-110°F will reconstitute the product. Recommended blending temperatures range from 100-130°F.

Typical Properties

Property	Typical Result
Total Sulfur, % (Active %)	10 (<1)
Copper Corrosion; 10% in oil, 3 hrs., 210°F	1B
Specific Gravity @ 25°C	.98
Density, lb./gal	8.1
Viscosity @ 100°C, cSt	41
Acid Value, mgKOH/g	3
Flash Point, C.O.C., °C	>175
Appearance	Dark Brown Viscous Liquid
