

PAROIL 358-NR
Chlorinated Olefin
Extreme Pressure Additive

Paroil 358-NR is a chlorinated compound. It is a nonflammable, non-corrosive, low volatile liquid at room temperature. **Paroil 358-NR** is a corrosion inhibited grade, designed to eliminate or significantly reduce stain and corrosion occurrence of the workpiece in high humidity and elevated temperature conditions.

Paroil 358-NR is typically (but not limited to) applied in straight oil machining, drawing and stamping fluids. The following information represents typical starting point formulation guides:

	<u>% Weight</u>
Straight Oil (Machining)	3-10
Straight Oil (Drawing and Stamping)	5-30

Paroil 358-NR may be stored in an original container or bulk storage tank. Exposure to 0°F for an extended period will cause significant viscosity increases. To reverse this, drums need to be returned to 80-90°F. Blending should not exceed 130°F. Prolonged exposure to temperatures in excess of 100°F may result in darkening of product and release of corrosive by-products.

Paroil 358-NR contains no substances subjected to reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR Part 372.

TYPICAL PROPERTIES

Property	Typical Result
Chlorine, %	59
Specific Gravity @ 25°C	1.39
Density (lb/gal)	11.6
Viscosity @ 210°F, SUS	172
Viscosity @ 77°, Poise	270
Flash Point °F, COC	>450
Color, ASTM	0.5
